

Banking Application

Stakeholders:

1. Branch Staff
2. Customer
3. Operations Admin
4. Manager

Now we are working on the feature for the application.

1. Customer

- View balances
- Detailed transaction history with filters (export PDF/CSV)
- Account details
- Profile/KYC: view & update profile, address, email/phone; KYC document upload & re-KYC reminders.
- Beneficiary management: add/edit/delete; cooling period & OTP confirmation.
- Virtual and physical card views(can do hardcode)
- PIN set/reset with OTP; reissue/replacement; statement download; rewards view.
- New applications: personal loan/credit card (pre-approved flows), eligibility pre-check.
- Loan account view: EMI schedule, payoff calculator, part-payment, foreclosure request.

Security

- 2FA (OTP, authenticator, device binding) biometric (where supported).
- Session history, active device list, remote logout.
- Fraud alerts & anomaly notifications

Chatbots

- In-app ticketing; chatbot + human handoff
- Track ticket status; upload docs; chat scheduling
- FAQs, branch/ATM locator, contact options.

Employee

- Customer search (CIF/account/email), 360° profile view.
- Cash deposits/withdrawals
- KYC capture & verification
- New account opening intake; service requests submission on behalf of customer.
- Real-time limits check (if we have time or we can work on it) (Easy)

Admin/Manager

- **User & Role Management:** create/disable users
- Product & Parameter Setup
- Beneficiary & Mandates
- KYC
- Reports

Manager

- Maker–Checker approvals.
- Manager will add Employee (Created with temp pwd).
- staff activity monitoring.
- Parameter change approvals; temporary limit enhancements.
- All the others feature that a employee can do

Unified customer view (accounts, tickets, recent auth attempts).

Secure customer verification scripts

Dispute case creation & status updates.
