

Lxl 2.2

Answer 1:

User Story 1: Event Creation and Scheduling

- **User Type:** Event Organizer
- **Action:** I want to create and schedule events with details like date, time, location, and participant list.
- **Benefit:** So that I can manage events efficiently and avoid scheduling conflicts.

User Story 2: Task Assignment and Tracking

- **User Type:** Event Organizer
- **Action:** I want to assign tasks to team members and track their progress.
- **Benefit:** So that I can ensure all event preparations are completed on time.

Answer 2:

SMART Breakdown for Event Creation and Scheduling

- **Specific:** I can add event details, invite participants, and set reminders.
- **Measurable:** The app tracks RSVPs and attendance for each event.
- **Achievable:** I can edit or cancel events, and all updates are notified to participants in real-time.
- **Relevant:** Proper scheduling ensures smooth event management and reduces last-minute confusion.
- **Time-bound:** Events are created ahead of time, and reminders are sent leading up to the event date.

SMART Breakdown for Task Assignment and Tracking

- **Specific:** I can assign tasks, set deadlines, and add priority levels for each task.
- **Measurable:** The app tracks completion status and sends reminders for pending tasks.
- **Achievable:** Team members can update task status, and I receive confirmation of progress.
- **Relevant:** Tracking tasks ensures accountability and timely completion, which leads to successful events.
- **Time-bound:** Tasks have specific deadlines, with automated reminders sent before due dates.

Answer 3:

I liked the post made by Sanjay (22f3001023) about academic deadlines management the most. The user stories were very practical and addressed a common problem that students face — missing deadlines due to scattered notifications. I especially liked how the first story included an AI assistant creating a weekly schedule, which made it feel specific, measurable, and very useful in a real academic setting.

Answer 4:

I have replied to 2 posts:

- Academic Deadlines Management. (22f3001023)
- Banking system features (fund transfer and loan application). (23f1000642)
